## WORK EXPERIENCE

---

**Software Engineer Intern**, Zenova Technologies (Top Notch), Nairobi, Kenya - (ReactJs, NextJs, MongoDB, Figma)

**April**

**2023 – May 2023**

- Took part in the development of two websites in NextJs 13 and MongoDB.
- Participated in the division and allocation of tasks in new projects among a team of six.
- Researched and created two Figma designs and presented the designs to clients' approval as a team.
- I wrote three blog articles to be posted on the company website.
- Taught team members such as Next Auth and improved engineering skills through prepared lessons.

**Creative and Marketing Assistant**, Onesha Technologies, Nairobi, Kenya - (Excel, Trello, Asana, Slack, MailChimp,)

**May 2021 – July 2021**

- Managed communication and coordinated graphics designs between clients and graphics designers through emails, calls, and messages, ensuring the client's needs were met.
- Email marketing; sent bulk emails to pitched to potential customers about services offered by Onesha Technologies using MailChimp.
- Teamwork coordination; through communication channels such as Trello, Slack, and Asana.
- Market research and analysis of the trends in the market and SEO research.
- Conducted physical and online interviews to recruit graphics designers.
- Assisted the founders manage high-value clients such as Top Foods by monitoring and following up on any incoming or outgoing communication via emails or calls.
- Data entry in excel and created google forms for better requirements communication from customers.

**2019 Census Enumerator**, Kenya National Bureau of Statistics, Nairobi, Kenya

**August 2019**

- Pre-enumeration job training and briefing
- Visited over 40 homesteads to conduct interviews in order to collect demographic data from Kenyan citizens.
- I feed the data on to the organization-issued devices as well as care for and maintain them.
- Worked closely with the assigned area guide to ensure every homestead within my assigned area was visited.
- Gave the supervisor a daily report and handed over the collected data.

## PROJECTS

---

**Weather App** ([Preview](#), [Source Code](#))

- NextJS 13 app that retrieves data from the OpenWeatherMap API and displays weather and temperature in different cities.

- The app can also determine the user geolocation and display the nearest city's weather.
- Compare temperatures in a bar chart using the ChartJs library.

#### **Matching Game** ([Preview](#), [Source Code](#))

- A card-matching game built in vanilla JavaScript.

#### **African Paints Gallery** ([Preview](#), [Source Code](#))

- African Paints and Pictures Gallery site in ReactJS.
- Styled in Tailwind CSS.

#### **Ihuini** ([Preview](#))

- WordPress Elementor.
- For Ihuini's YouTube channel
